

B100

INKCUPS

B100

The B100 pad printer is a compact tabletop single-color sealed cup pad printer that incorporates our patented VersaCup ink cup assembly with a two-sided ceramic ring. Unlike most pad printers, the B100 is a tool-less setup to support rapid job changeover perfect for light duty, heavy duty and even lab environment projects. This machine is designed to handle items as tall as 4.25 inches (108mm) in height, including the part fixture. It has a robust pad compression capability of 120lbs at 80 PSI. An illuminated plate system provides visibility to the work area and the variable inking and print frequency controls allow the operator to regulate print opacity.

Operation of the B100 is smooth and repeatable. The intuitive membrane touch control feature provides ease of program adjustment and machine functions.

FEATURES

ONE COLOR PAD PRINTER

**AVERAGE PRODUCTION SPEED:
900 - 1300 IPH**

**MAXIMUM ARTWORK SIZE:
3.14" (80MM)**

PLATE SIZE: 100MM X 225MM

CURRENT/VOLTAGE: 5A/110V

DIMENSIONS (L x W x H): 25" x 14" x 21"

COMMON APPLICATIONS:

- Apparel
- Silicone items
- Sporting goods
- Plastic molded items
- Marketing items
